

CSCI 4440 — Software Design and Documentation
Mini-Assignment 4 (document version 1.1) — DUE November 9, 2020
Design Reviews

Overview

- This fourth mini-assignment is to be completed by each of your project teams and is due by 11:59PM ET on the due date shown above
- Define your group in Submitty in the Mini-Assignment 4 gradeable, then only one of you need submit your final work; if submitted late, all group members must use a late day

What to do

For this fourth mini-assignment, you will record findings from a design review with another project team. Note that you can work with any other project team across both sections. And you should plan to pair up and do design reviews in both directions, i.e., team A reviews team B, then team B reviews team A (though this is not required as long as you have your design reviewed **and** also review another team's design).

To find another team to work with, look in Nooks during your team meetings for other teams. ~~(v1.1) We will also plan to have a list of teams (across both sections) with contact information posted in Submitty as soon as possible.~~ A list of teams (across both sections) with contact information is available in Submitty. And as per usual, use the Discussion Forum to help here, too.

The primary purpose of this mini-assignment is to improve your design for Team Deliverable 3. Therefore, for this mini-assignment, just record meeting minutes for your design review—more specifically, only record minutes for the critique of *your design*.

Provide a list of your findings, including at least **three major suggestions for refactoring**. Feel free to include portions of your design diagrams to more effectively show potential revisions and refactorings. Even if you decide to ignore some suggestions, include the feedback you receive.

We are still in the design phase. Therefore, continue to avoid discussing implementation details (e.g., we don't care yet which specific database(s) or programming language(s) you will use).

What to submit

Please submit a single PDF file that captures a summary of your meeting, in particular a summary of your findings. As per usual, proofread your work before submitting. We will assign grades (and provide feedback) based on the above details and the quality of your presentation.
